COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

The Examiner's statement of reasons for allowance paraphrases/quotes the introductory and final paragraphs of each of applicants' independent claims and states that the prior art does not teach or suggest these paragraphs "in combination with the remaining limitations of the claims." Applicants' understanding of this format for the Examiner's statement is that it represents a shorthand way of stating that each of applicants' claims when taken as a whole (including each independent claim and each dependent claim) is not disclosed or suggested by the prior art. Applicants request that they be informed if this understanding is incorrect.

Applicants have noted some differences between the language of their claims and the Examiner's paraphrasing of the claims, e.g., the Examiner's discussion of Claims 7-11 refers to "the specified cylindrical surface," "the set of inductive elements," and "function $n \cdot S$," while independent Claim 7 refers to cylindrical surfaces, sets of inductive elements, and functions $n \cdot S$. See also the discussion of Claims 22-30 which refers to a single surface whereas independent Claim 22 refers to two surfaces. These differences are assumed to be in the nature of typographical errors and not

intended to limit or otherwise affect the scope of applicants' claims. Again, if this understanding is incorrect, applicants respectfully request to be so informed by the Examiner.

Finally, applicants have noted that the PTOL-37 form which transmitted the reasons for allowance did not acknowledge applicants' claim for foreign priority. However, the filing receipt for this application (copy attached as Exhibit A) does acknowledge the foreign priority claim and the certified copy of Australian priority application No. PR0059 was submitted in parent application number 09/947,178. Accordingly, applicants believe that their claim for foreign priority has been perfected in this application, but if the Examiner believes that anything further is required, he is respectfully requested to contact the undersigned.

Consideration of the foregoing in connection with the prosecution of this application is respectfully requested.

Respectfully submitted,

Date: 1/22/08

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
